AVAILABILITY

Fueled by Trust, Powered by Nature!

Envira is a standardised range of biofuels, manufactured as per benchmark processes of BiofuelCircle.

One Country, One Quality

End to end visibility & monitoring
from farm to furnace

The Envira Difference

Surety of Quality

- Manufactured under benchmarked practices & standard operating conditions as per BiofuelCircle's Blue standard verification process.
- From raw material to briquetting, testing is done at every stage of production and updated on platform.
- Assured specific GCV, ash & moisture percentages

Green Traceability

- Sourced from Biomass Banks – digital franchise of BiofuelCircle
- Region of origin, farm & farmer-level information is updated on the platform
- Leading to authenticated green tokens.

ENVIRA bio-briquettes, available in 3 quality grades to meet your needs.

Standard

GCV Up to 3400 kcal/kg

Ash ≥ 12%

Moisture ≥ 12%

Superior

GCV 3400-3800 kcal/kg

Ash 8-12%

Moisture 8-12%

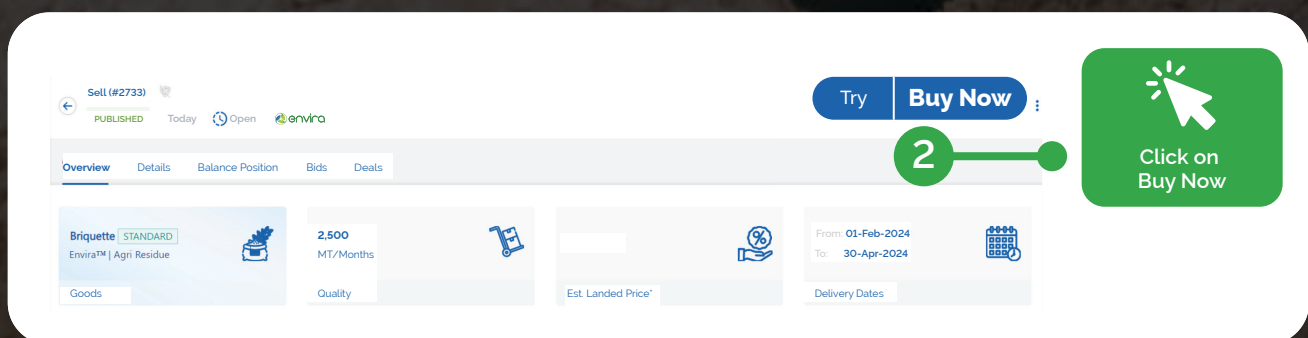

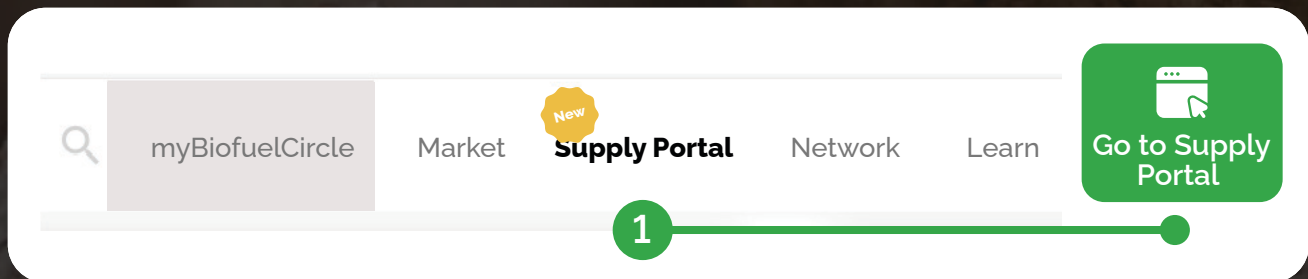

Premium

GCV ≥ 3800 kcal/kg

Ash < 8%

Moisture < 8%
